De mollen hebben heel veel spullen meegenomen en op de sombrero gestapeld. Teken die spullen en bedenk hoe het allemaal in evenwicht blijft. Laat je fantasie de vrije loop!

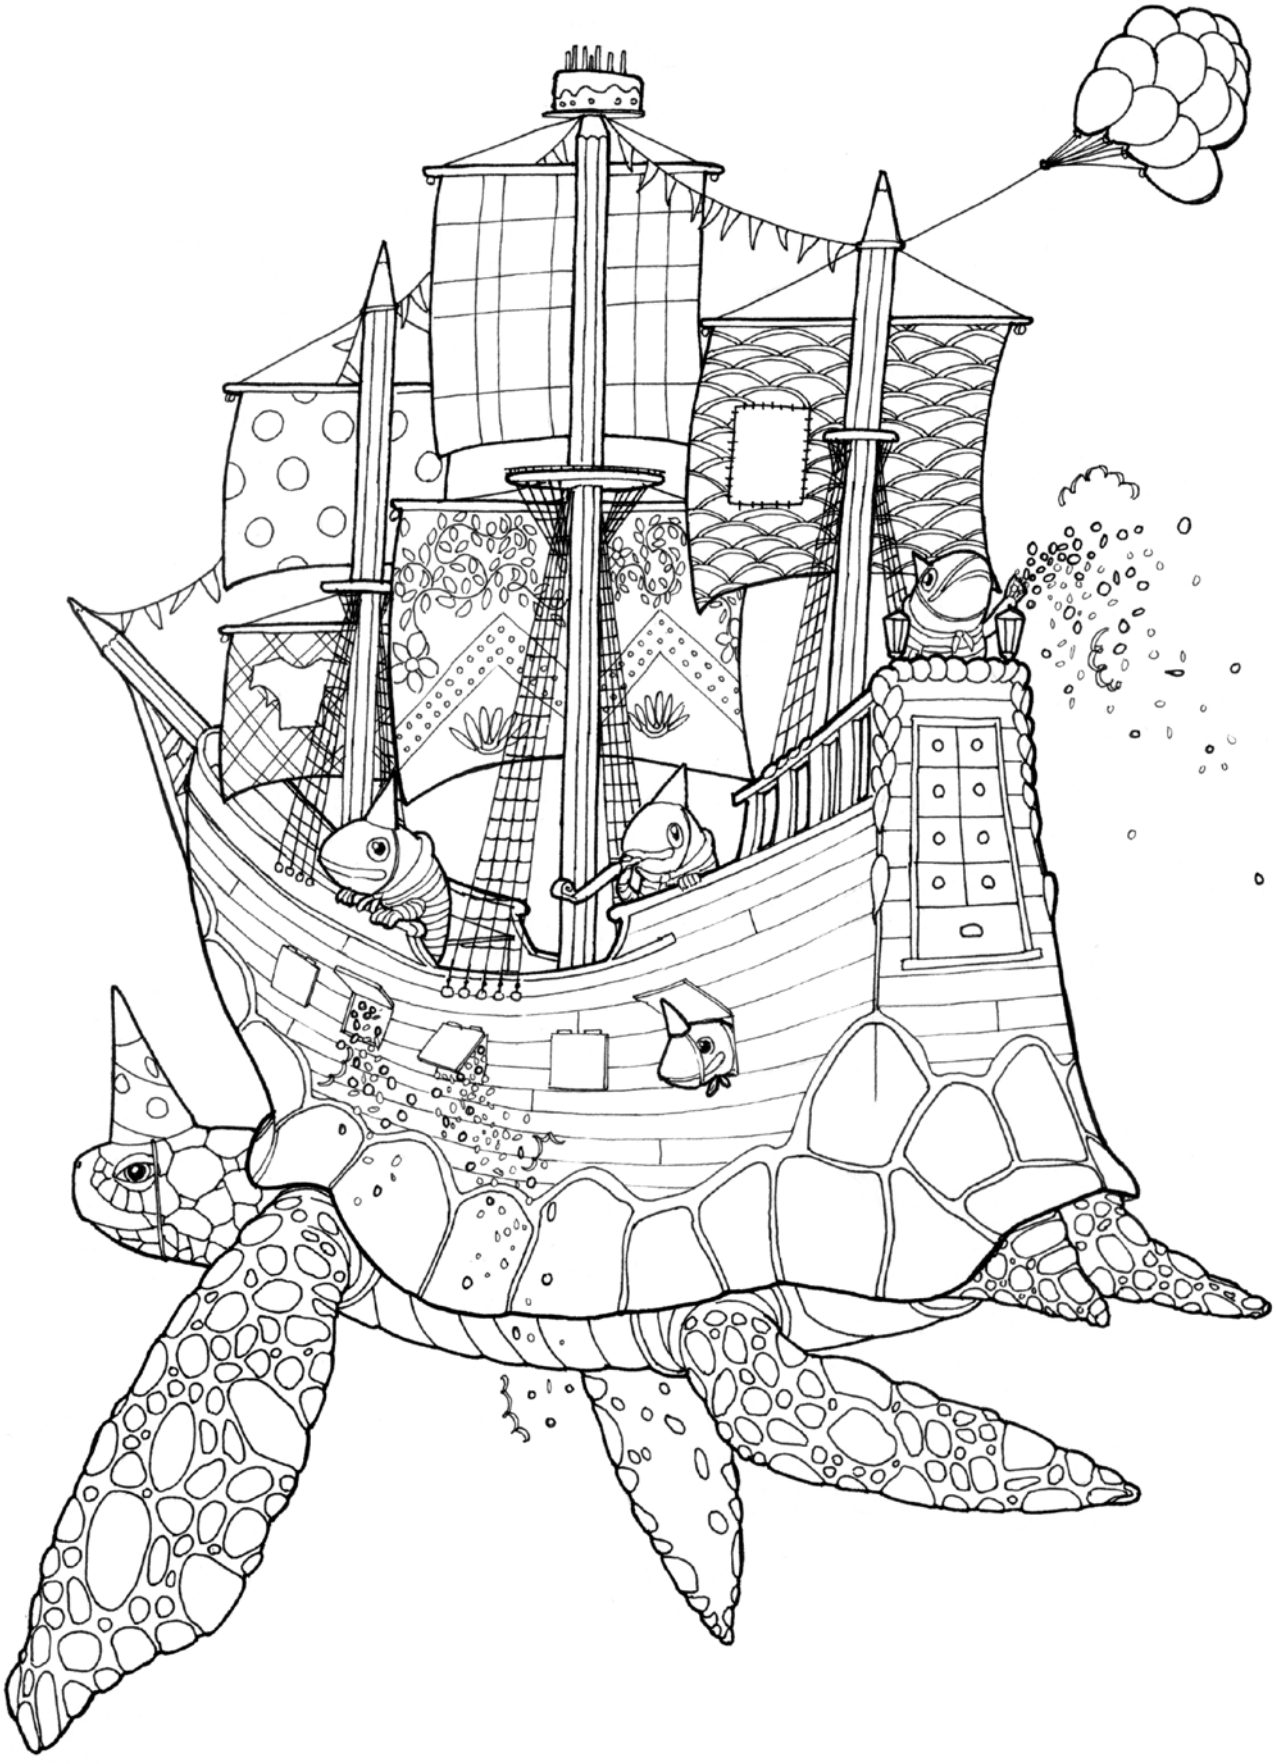

The moles have taken all their belongings and stacked them on the sombrero. Draw lots of stuff and figure out how it all stays balanced. Let your imagination run wild!

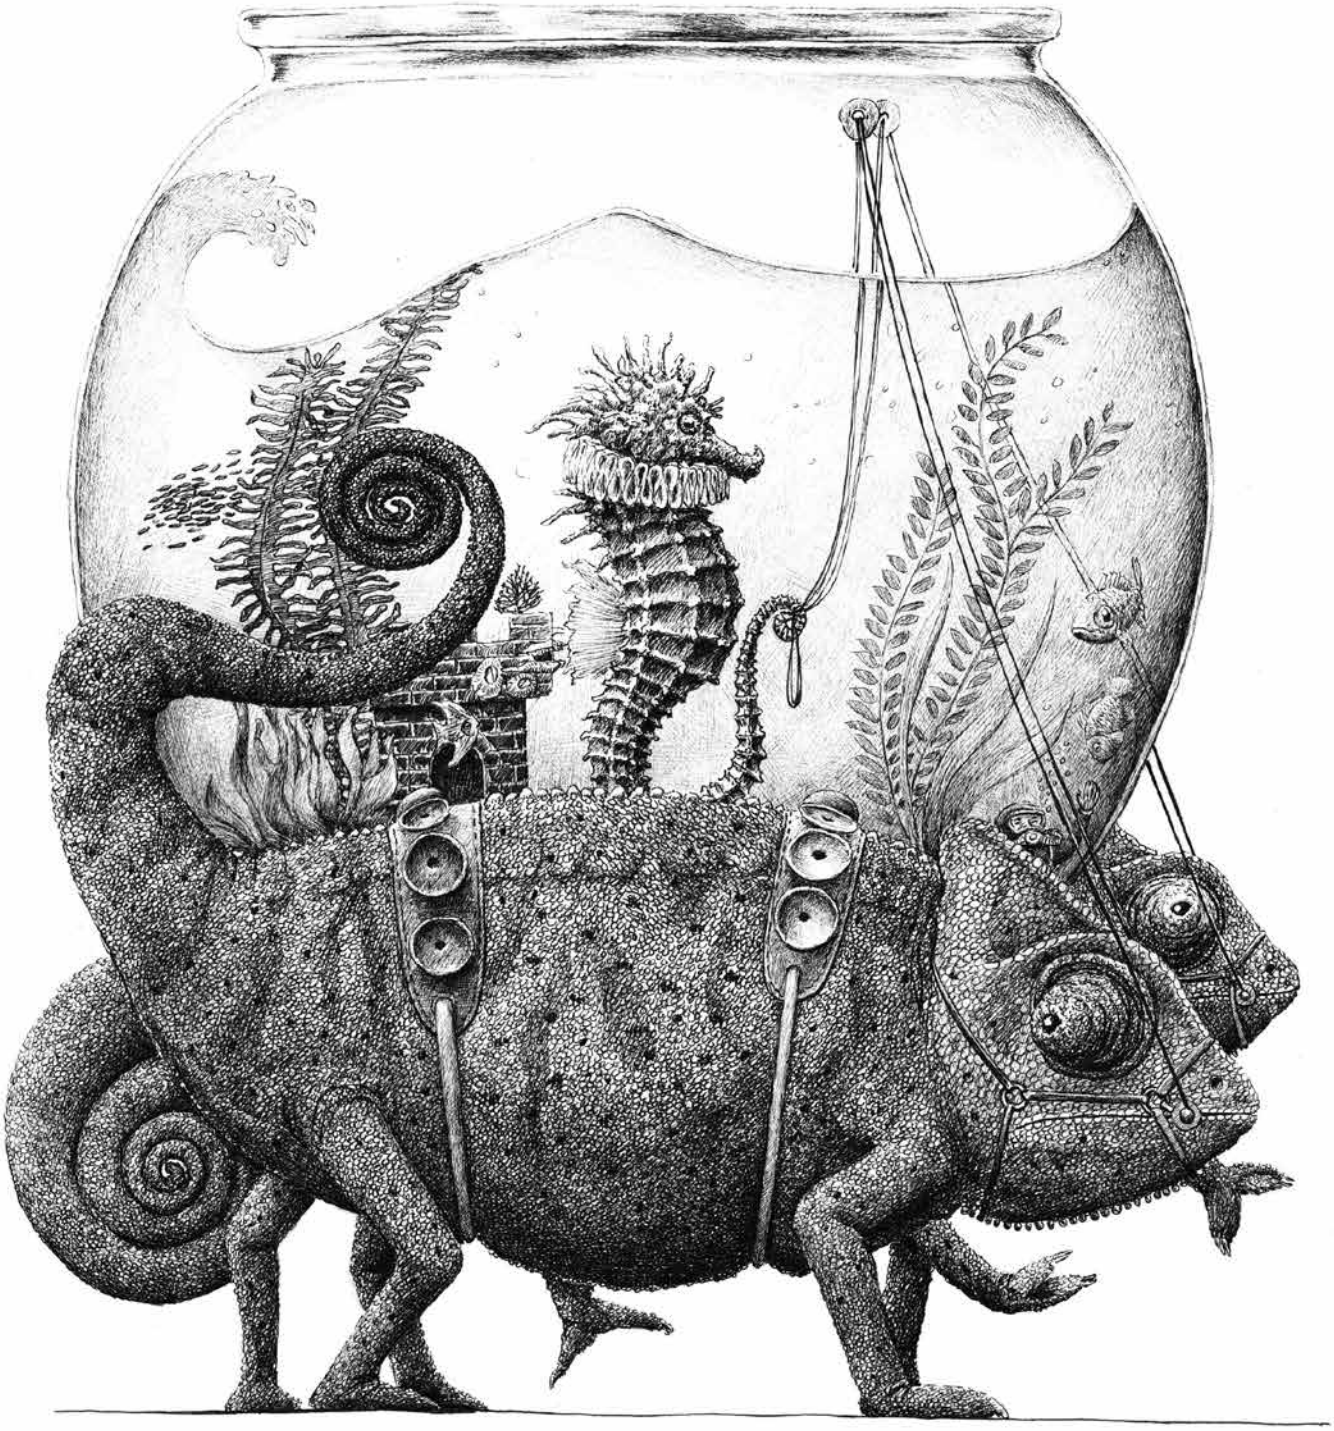

Teken nog drie vliegende wezens. Probeer alternatieve manieren van vliegen te gebruiken en geen vleugels.
Draw three more flying creatures. Try to use alternative ways of flying, without wings.

De watermeloen poept zaadjes, wat voor planten zouden daaruit groeien? Teken gerust een heel oerwoud.
The watermelon is pooping seeds – what kind of plants would grow from those? Feel free to draw a whole jungle.
